

- Made from renewable grain hulls
- A long lasting alternative to plastic
- Durable and lightweight
- Suitable for outdoor and indoor use

***How long do they last?***

EcoForms pots are designed to last up to five years outdoors, and longer indoors.

***What are they made from?***

EcoForms pots are primarily made from rice hulls and natural binding agents.

***Do they work as well as plastic pots?***

Our tests show that most plants grow better and more vigorously in EcoForms pots.

***Can they handle freezing?***

EcoForms pots show no damage when exposed to freezing or thawing conditions.

***Can I put them in my compost?***

EcoForms pots are best disposed of in your local municipal compost program.

***Can I plant the pot in the ground?***

EcoForms pots are meant to be used above ground only.
